

Inspection Engineer – Bridge

Salary: £Competitive

Location: Edinburgh

The Company

Cyberhawk are a fast-growing SME and are now the market leader in the application of remotely-operated aerial vehicles (drones). The Company provides services to clients around the world in sectors including Oil & Gas, Renewables, Utilities and Rail. The Company is currently looking to expand across all of these sectors and is also focusing on new operations set up to target the US market.

The Role & Key Responsibilities:

We are looking for an experienced bridge engineer who is open to innovating new ways to inspect structures. You will manage bridge-related projects, and work with multi-disciplinary engineers to develop efficient inspection and reporting methods, while remaining compliant with existing industrial standards. By joining our team, you will be part of a fast-growing company and can transfer your skill-set to sectors not limited to Software, Utilities, Renewables and Oil & Gas.

- Carrying out inspections and surveys of masonry, concrete and metallic bridge structures in accordance with appropriate standards and preparing subsequent reports of the highest standard
- Assistance with quotations & tenders for clients
- Check colleagues output (reports etc) to ensure standards are continually attained in line with company procedures and set reporting standard
- Help mentor graduate engineers in their career progression
- Client liaison
- Promote safe working practices
- Ensure that full compliance with appropriate standards for the examination of bridge structures is achieved for both physical examinations and subsequent examination reporting
- Produce documents and reports to the required standard first time and within time scales set
- Actively develop working methods to improve the quality and efficiency of the output

Essential Requirements:

- Relevant degree/HND/HNC in civil or structural engineering or equivalent qualification or experience
- STE4 qualified or similar bridge inspection qualification
- Working knowledge of rail, road, local authority standards and specifications for bridge inspection
- Strong experience of structural inspection, design, assessment and checking of bridges
- Recognise and categorise defects on structures and record them in the asset management system
- Make observations and technically based decisions within sphere of competency for the role

CYBERHAWK

Aerial Inspection and Surveying Specialists

- Strong working knowledge of British Standards and Eurocodes
- Experience working with multi-disciplinary teams
- Have in depth knowledge of structure types, common failure modes, the recognition of structural defects and the deterioration of structural elements.

Essential Attributes:

- An open and approachable team player
- Solid communication and relationship building skills with ability/experience to interface with clients
- A correct first time approach to work
- Drive and determination to succeed
- Willingness to ensure Health & Safety awareness in all aspects of design and operations
- In possession of a Full driving licence
- Fluency in spoken English and the ability to write high quality technical reports in English
